

Insider Transactions

Access to the SEDI system (System for Electronic Disclosure by Insiders) can be obtained by clicking the link below or going to www.sedi.ca. The SEDI system was established by the securities regulatory authorities in Canada to facilitate the filing and public dissemination of "insider reports" in electronic format via the Internet and the SEDI website. The SEDI system became operational in June 2003, and insider reporting from that point forward is made in the SEDI system. Historical insider reporting prior to June 2003 is not available in the SEDI system.

The SEDI system uses dynamic Internet sessions which precludes us from providing a link directly to the filings for the Rogers group of companies. However, Insider reports and certain related information filed in SEDI are available on this website, as follows:

1. To view an insider's profile, click Access public filings and then click View insider information.
2. To view an issuer's profile or issuer event reports, click Access public filings and then click View issuer information.
3. To view summary reports compiled for the applicable securities regulatory authorities, click Access public filings and then click View summary reports.

When prompted by SEDI for Issuer Name or Issuer Number, you can either search Rogers Communications, or you can enter the Issuer Number that has been assigned by SEDI which is: 00003765 for Rogers Communications Inc. www.sedi.ca
