Cautionary note

The following materials are for presentation purposes only. They accompany the discussions held during Rogers Communications Inc.'s (Rogers) investor conference call on April 18, 2019. These materials should be read in conjunction with the disclosure documents referenced below.

Certain statements made in this presentation, including, but not limited to, statements relating to expected future events, financial and operating results, guidance, objectives, plans, strategic priorities and other statements that are not historical facts, are forward-looking. By their nature, forward-looking statements require Rogers’ management to make assumptions and predictions and are subject to inherent risks and uncertainties, thus there is risk that the forward-looking statements will not prove to be accurate. Readers are cautioned not to place undue reliance on forward-looking statements as a number of factors could cause actual future results and events to differ materially from that expressed in the forward-looking statements. Accordingly, our comments are subject to the disclaimer and qualified by the assumptions and risk factors referred to in Rogers’ 2018 Annual Report, and Rogers’ First Quarter 2019 MD&A (which was issued on April 18, 2019), as filed with securities regulators at sedar.com and sec.gov, and also available at investors.rogers.com. The forward-looking statements made in this presentation and discussion describe our expectations as of today and, accordingly, are subject to change going forward. Except as required by law, Rogers disclaims any intention or obligation to update or revise forward-looking statements.

This presentation includes non-GAAP measures, including adjusted EBITDA, adjusted EBITDA margin, adjusted net income, adjusted diluted EPS, adjusted net debt, debt leverage ratio (adjusted net debt / 12-months trailing adjusted EBITDA), and free cash flow. Descriptions of these measures and why they are used can be found in the disclosure documents referenced above. Effective January 1, 2019, we adopted the new accounting standard, IFRS 16, Leases (IFRS 16), that is discussed in “Critical Accounting Policies and Estimates” in Rogers’ First Quarter 2019 MD&A. The adoption of IFRS 16 had a significant effect on our reported results. Due to our selected transition method, we have not restated our prior year comparatives.

This presentation discusses certain key performance indicators used by Rogers, including total service revenue (total revenue excluding equipment revenue in Wireless and Cable), subscriber counts, subscriber churn, blended ARPU, and blended ABPU. Descriptions of these indicators can be found in the disclosure documents referenced above.
